Parameters:

Name: Ship type switch

Model: KCD1

Electrical life: 10,000 times or more

Product power: 2000WRated current: 6A/10ARated voltage: 125V/250VContact resistance $\leq 50m\Omega$ Insulation resistance $\geq 100m\Omega$

Dielectric strength≥1500V AC/1min

Material: flame retardant shell steel foot silver point

Product range:

Rocker switches are used in water dispensers, treadmills, computer speakers, battery cars, motorcycles, massage machines, toy cars, and some electronic equipment power switches
